NOW Telecom Embarks on a Broad Network Expansion Following NTC's 3.5Ghz License Renewal

In an ambitious stride towards enhanced national connectivity, NOW Telecom Company, Inc., an associate of NOW Corporation, announced the successful renewal of its radio station licenses within the coveted 3.5 GHz spectrum by the National Telecommunications Commission (NTC) in January 2024.

This pivotal move marks NOW Telecom's proactive efforts to augment its telecommunications network across the Philippines. This license renewal heralds a pivotal chapter for NOW Telecom, symbolizing a committed effort to mitigate the digital divide, with a keen focus on elevating connectivity in public and private, including residential, and particularly, in previously unserved and underserved locales. As a reminder, NOW Telecom is distinguished as one of only four entities awarded a licensed mobile telecommunications system (MTS) by the NTC, a group that includes esteemed operators Smart, Globe, and Dito. The original MTS license, granted in 2006, is "not specific to 3G," thus, encompassing technologies beyond 3G — such as 5G, 6G, and satellite to mobile phone communications — underpins the company's capability to leverage emerging technologies.

The reaffirmed license is set to accelerate the deployment of broadband services across multiple sectors, emphasizing the vital role of connectivity within critical infrastructure. NOW Telecom is committed to constructing secure, dependable, and resilient communication networks, built upon trusted technology, and is dedicated to bolstering the 16 critical infrastructure sectors as delineated by both Philippine agencies and the U.S. Department of Homeland Security.

Engr. Rene Rosales, President and CEO of NOW Telecom, affirms, "The reauthorization of our license, particularly within the strategic 3.5Ghz band, will substantially reinforce NOW Telecom's stature as a burgeoning force in the nation's telecom landscape, especially as we undertake the protection and connection of our most essential sectors."

Pioneering a Secure and Reliable Telecommunications Framework

In its vanguard, NOW Telecom pioneers the Trusted Network Initiative, a consortium encompassing public, private, and Indo-Pacific partners, devoted to cultivating network security and dependability through the principles of Zero Trust Architecture. This initiative mirrors the company's unwavering commitment to the protection of consumer data and the integrity of both its public and private telecom networks.

In a groundbreaking partnership, the United States government signaled its alliance with NOW Telecom in November 2022, propelled by a US Trade and Development Agency grant amounting to US\$2.15 million. This grant aims to examine the market and technical viability of NOW Telecom's envisioned nationwide 5G mobile and broadband networks. The company has secured alliances with global technological leaders, including NOKIA, Ericsson, CISCO, Fortinet, Celona, OneWeb, SK Telecom, among others, fortifying its market position.

Additionally, NOW Telecom's collaboration with the Cybersecurity Investigation and Coordination Center (CICC) underscores its dedication to addressing the connectivity and cybersecurity imperatives of the nation's critical infrastructure.

Furthermore, it is notable that in November 2023, NTC reiterated its confidence in NOW Telecom by renewing its 800Mhz frequency band license, thereby facilitating the company's efforts to enhance Public Safety and vital communications infrastructures.
