NOW Corporation is partnering by way of MOU with Rivada Space Networks, a German satellite communication service company, to provide a unique next generation connectivity network for the Philippines. NOW will harness the OuterNET™, Rivada's global low-latency point-to-point connectivity network of 600 low earth orbit (LEO) satellites, with seamless connectivity that will ramp up performance, improve security, and increase customer efficiency. Rivada's industry-leading solutions will provide resiliency for high quality voice, video and data solutions to enterprises that require secure infrastructure, such as banking and financial services, mining and transportation. This approach to "orbital networking," in which data stays in space from origin to destination, creates an ultra-secure satellite network with pole-to-pole coverage, offering end-to-end latencies much lower than terrestrial fiber over similar long distances. By routing traffic on a physically separated network, it provides a layer of defense for any organization that needs to securely share data between widely distributed sites. The OuterNET allows satellites to go beyond their traditional role of 'gap-filler.' It is a fully inter-connected space network, which is rapidly becoming the infrastructure of choice for secure data communications.

Pursuant to the requirements of the Securities Regulation Code, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
